## **Installing the GECS Agent for DOS from the ZIP File**

- A. Start the DOS computer where you will run the agent and login to the network.
- B. You will need a copy of the DOS PKUNZIP program.
- C. Create and change to the \GECSINST subdirectory on drive C:  
C:  
MD \GECSINST  
CD \GECSINST
- D. Copy the downloaded ZIP file to this subdirectory and unzip it.  
PKUNZIP -D GECS-DOS-*nnnnnn*.ZIP  
(*nnnnnn* is the 6 digit number in the file name)
- E. Enter INSTALL
- F. Enter the name of the agent's private directory that is accessible from the Windows computer running the database and controller. (i.e. F:\GECS\agentname). Each DOS agent must run from separate directory.

To start the agent, from the agent directory enter:  
dosagent *agentname*
